SIT
FURNITURE
DESIGN AWARD

Sunset armchair by Robin Delaere

A man in a white suit is seen from the side, tending to a garden path. The path is made of light-colored gravel and is surrounded by lush greenery, including various plants and trees. The scene is set in a garden or park area with a gravel path leading through it.

SIT Furniture Design Award™ was created as a way to celebrate and share the remarkable work of furniture designers and those who use furniture in their projects. Creativity, innovative vision, and accessibility in the furniture design community deserve to be applauded and shared widely, across the world.

We carefully select our jury from industry professionals who are all leaders in their field. Each talented member of our jury is a leader in their organization and field, continuing to provide aspirational contributions to the industrial design community — and each wants to give something back, to help find today's very best visionary designs and designers.

JUDGING CRITERIA

The evaluation process for entries to the SIT Furniture Design Award is based on various judging criteria that are constantly adapted to new technical, social, economic, space atmosphere, and ecological requirements. These criteria are not comprehensive and not all criteria are applicable to each product & design. They simply provide an orientation framework and basis for judging, which is complemented by each individual juror's expertise and socio-cultural background.

- Innovation — does the product provide something new to the market or supplement/improve an existing product?
- Aesthetics — form, shape, color, texture, finishing, the material used, etc.
- Functionality — ease of use, safety, maintenance, etc.
- Ergonomics — the product's interaction with the user
- Durability — the quality and longevity of the design
- Impact — the benefit delivered to the user and/or society by the product
- Utility — does the product meet the intended purpose and needs of the user?
- Ecological compatibility — potential environmental and/or ecological impact
- The reality of production — how realistic is it, technically and economically, to develop and market this product large scale?
- Emotional quotient — in addition to fulfilling its practical purpose, does the product create a sense of enjoyment, and satisfaction?
